Category 3-A licenses are approved by the Department Of Conservation (DEC) for pesticide application on ornamental trees, shade trees, and turf grass.

Suggestion: When calling prospective companies to treat for EAB, ask and verify if the applicator is also a certified arborist. Arborists (tree professionals) can determine if the tree is a good candidate for treatment. Alternatively, have a certified arborist evaluate your tree and recommend treatment before seeking a pesticide applicator. Find out if the pesticide applicator has experience applying treatments recommended for EAB — it is not a given that a company will do EAB treatments (trunk injection, soil injection, soil drench, or basal trunk spray).

This list is for reference only. Inclusion on this list does not represent an endorsement. It is your responsibility to confirm that the arborist or pesticide applicator has active certification and insurance. To provide an update or addition for this list, please contact John Tenbusch at jtenbusch@stlawco.org.
